

SPOT TILLAGE

All-in-one land prep equipment highly improving bed soil quality.

SPOT TILLAGE FOR SUGAR CANE

All-in-one land prep equipment highly improving bed soil quality whilst saving cost (30/40% average) by replacing conventional multi passes with heavy harrows and subsoilers.

Versatile equipment able to be used only for bed preparation and/or as a previous pass to eliminate old cane by tritulating/exposing stools up on the surface.

Rotovator can be unhitched from tractor using either cutting discs and subsoiler or the rotovator independently. Equipment three point hitch to the tractor, without hydraulic connections, powered by tractor PTO 540 RPM.

Tech Specs

- Three 22" straight notched discs (optional 5 discs) cutting trash.
- TWO (2) subsoilers working up to 45cm deep adjustables in working width for dual line system, or ONE (1) subsoiler working up to 60 cm deep ending in a 72cm wide shark fin tyne type for single or double line row system.
- Rotovator working up to 20 cms deep, leaving soil refined/mulched with particles of maximum 2 cms ensuring maximum contact soil/eye bud.
- Working width: 100 cm for dual line system.
- Power required: +150 HP
